

Integrated Transit & Multimodal Study

This effort is to improve existing transit services and find ways to provide reasonable and reliable transit to people who do not own or have access to their own transportation, who do not own a phone, and/or who have limited personal mobility.

PROJECT GOALS

- Find short- and long-term projects to help people move around the County more easily and efficiently, including to jobs, doctors' appointments, government services, and schools.
- Connect people to rail stations, transit hubs, and major activity centers through transit opportunities.
- Create a transportation system that increases options for getting around.
- Define bicycle and pedestrian connections that support and encourage transit use.
- Strengthen collaboration between Douglas County municipalities.

IN PARTNERSHIP WITH

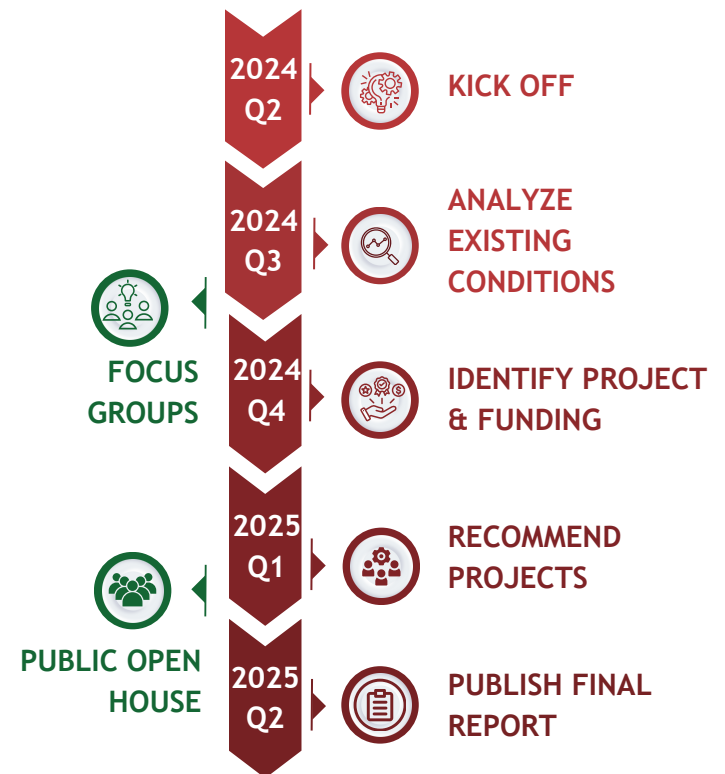

ENGAGE WITH US

As we invest in a safe and accessible multimodal transportation system with various road expansion projects, we also want to learn more about how you and your neighbors want to use transit in the future.

- Visit the project website for news about the study, what the County has learned through engagement and data analysis, and ways to be involved.
- Join open houses and in-person conversations to help us understand needs, barriers, and perceptions about transit.
